No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (Operations Staff, P.O. Box 765, Schenectady, New York 12301), for copying beyond that permitted by Sections 107 or 108 of the U. S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1978 articles are the same as those shown for current articles.

CONTENTS OF VOLUME 9

Number 1, January 1978

Geneviève M. Woillard. Grande Pile Peat Bog: A Continuous Pollen Record for the Last 140,000 Years 1

G. Robert Brakenridge. Evidence for a Cold, Dry Full-Glacial Climate in the American Southwest 22

Odette Conchon. Quaternary Studies in Corsica (France) 41

Russell S. Harmon, Peter Thompson, Henry P. Schwarcz, and Derek C. Ford. Late Pleistocene Paleoclimates of North America as Inferred from Stable Isotope Studies of Speleothems 54

Douglas F. Williams and John Keany. Comparison of Radiolarian/Planktonic Foraminiferal Paleoceanography of the Subantarctic Indian Ocean 71

William Halsey Hutson. Application of Transfer Functions to Indian Ocean Planktonic Foraminifera 87

Letters to the Editor

G. E. Williams. Comment on "Late Quaternary Climates of Australia and New Guinea" by J. M. Bowler, G. S. Hope, J. N. Jennings, G. Singh, and D. Walker 113

J. M. Bowler, G. S. Hope, J. N. Jennings, G. Singh, and D. Walker. Reply to Comment by G. E. Williams 114

P. F. Karrow. Comment on "Greatlakean Substage: A Replacement for Valderan Substage in the Lake Michigan Basin" by E. B. Evenson, W. R. Farrand, D. F. Eschman, D. M. Mickelson, and Louis J. Maher .. 116

Robert F. Black. Comment on "Greatlakean Substage: A Replacement for Valderan Substage in the Lake Michigan Basin" by E. B. Evenson, W. R. Farrand, D. F. Eschman, D. M. Mickelson, and L. J. Maher 119

Edward B. Evenson, William R. Farrand, Donald F. Eschman, David M. Mickelson, and Louis J. Maher. Reply to Comments by P. F. Karrow and R. F. Black 123

Thomas F. Lynch. Peopling of the Americas: A Reply to Irving Rouse .. 129

Irving Rouse. Comment on Lynch's Reply 131

Paul A. Colinvaux. On the Use of the Word "Absolute" in Pollen Statistics 132

Book Reviews 134

Number 2, March 1978

André L. Berger. Long-Term Variations of Caloric Insolation Resulting from the Earth's Orbital Elements 139

John F. Shroder, Jr. Dendrogeomorphological Analysis of Mass Movement on Table Cliffs Plateau, Utah 168

John F. Marshall and Jean Launay. Uplift Rates of the Loyalty Islands as Determined by $^{230}Th/^{234}U$ Dating of Raised Coral Terraces 186

ROY ALLEN SCHROEDER AND JEFFREY L. BADA. Aspartic Acid Racemization in Late Wisconsin Lake Ontario Sediments 193

RUSSELL S. HARMON, HENRY P. SCHWARCZ, AND DEREK C. FORD. Late Pleistocene Sea Level History of Bermuda 205

G. P. RIGHTMIRE. Human Skeletal Remains from the Southern Cape Province and their Bearing on the Stone Age Prehistory of South Africa 219

R. THOMPSON. Resistivity Investigation of an Infilled Kettle Hole 231

H. FÖLSTER AND W. HETSCH. Paleosol Sequences in the Eastern Cordillera of Colombia 238

LETTERS TO THE EDITOR

FRANZ FLIRI. Comment on "Nondeterministic Theories of Climatic Change" by E. N. Lorenz 249

EDWARD N. LORENZ. Reply to Comments by Franz Fliri 249

ERVIN G. OTVOS, JR. Comment on "The Tunica Hills, Louisiana–Mississippi: Late Glacial Locality for Spruce and Deciduous Forest Species" by Paul A. Delcourt and Hazel R. Delcourt 250

PAUL A. DELCOURT AND HAZEL R. DELCOURT. Reply to Comments by Ervin G. Otvos, Jr. 253

BOOK REVIEWS 260

NUMBER 3, MAY 1978

JAMES A. CLARK, WILLIAM E. FARRELL, AND W. RICHARD PELTIER. Global Changes in Postglacial Sea Level: A Numerical Calculation 265

D. D. KVASOV. The Barents Ice Sheet as a Relay Regulator of Glacial–Interglacial Alternation 288

LARRY V. BENSON. Fluctuation in the Level of Pluvial Lake Lahontan During the Last 40,000 Years 300

T.-H. PENG, J. G. GODDARD, AND W. S. BROECKER. A Direct Comparison of ^{14}C and ^{230}Th Ages at Searles Lake, California 319

JOHN F. WEHMILLER AND DANIEL F. BELKNAP. Alternative Kinetic Models for the Interpretation of Amino Acid Enantiomeric Ratios in Pleistocene Mollusks: Examples from California, Washington, and Florida 330

RICHARD B. BRUGAM. Pollen Indicators of Land-Use Change in Southern Connecticut 349

ANNOUNCEMENT 368

LIST OF CRITICAL REVIEWERS 369

AUTHOR INDEX FOR VOLUME 9 370

QUATERNARY RESEARCH

An Interdisciplinary Journal

EDITORIAL POLICY

Quaternary Research is devoted to *interdisciplinary* articles dealing with the Quaternary Period. Editorial policy requires that articles must be of broad interest, of basic significance to more than one discipline, and of high merit. Previously unpublished research results, comprehensive reviews of a field of knowledge, and occasional English translations of outstanding articles in other languages will all be considered. Generally, articles should be in English, but a small proportion of articles in French, German, or Russian will be accepted. Articles should not exceed 5000 words, but exceptions can be made for especially significant contributions. All articles will be reviewed by at least two referees.

Manuscripts and figures should be submitted at least in duplicate (a third copy could speed processing) to:

Quaternary Research
Editorial Office
University of Washington
Seattle, Washington 98195

Manuscripts are accepted for review with the understanding that the same work has not been and will not be published nor is presently submitted elsewhere, and that all persons listed as authors have given their approval for the submission of the paper; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in *Quaternary Research* represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the University. The University will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

INSTRUCTIONS TO AUTHORS

General Instructions

Manuscripts should be written in clear and concise English and should conform to the general style of the journal and the specific instructions listed below. Manuscripts that are not adequately prepared will be returned to the authors, since it is not feasible for the Editors to revise or rewrite manuscripts. Contributors, particularly those unfamiliar with English usage, are encouraged to seek the help of colleagues in the preparation and review of manuscripts prior to submission. This practice reduces the time required for review and avoids delays in publication.

Form and Style. Manuscripts should be concise but detailed enough to permit critical appraisal. They should be typewritten and double-spaced throughout (including tables, legends, and footnotes) on one side of approximately 22- × 28-cm (8.5- × 11-in.) paper with 2.5-cm (1-in.) margins. Tables and figure legends should be typed separately and placed at the end of the manuscript. All pages, beginning with the title page and including tables and figure legends, should be numbered consecutively and fastened securely. The title page should include the article title, author(s), affiliation(s) and address(es), and suggestions for index entries. Addresses should include zip codes or postal districts when applicable. All correspondence regarding the manuscript will be made with the person submitting the manuscript.

Authors are requested to include an Abstract (50–200 words, typed on a separate page following the title page). The Abstract should be a concise and informative summary that can be copied verbatim by bibliographers. The title must be suitable for indexing.

Units. Metric units should be used throughout, with English equivalents in parentheses if originally given in English units. When used in conjunction with numerals, units should be abbreviated and unpunctuated (e.g., cm, g, %). Use the American Chemical Society Handbook as a guide.

Numbers. Numbers less than 10,000 should be expressed without a comma (e.g. 5455) but those of greater value should have a comma or commas separating each triad of digits (e.g., 15,640; 1,200,000).

Dates. Historical dates should be expressed as years B.C. or A.D. (e.g., 1850 A.D.; 2000 B.C.). Radiocarbon dates should be expressed in ^{14}C yr B.P. (before present) and should include the standard error as well as the laboratory number (e.g., 14,730 ± 150 yr B.P. (Y-661)). If the dates have been corrected for atmospheric variations in radiocarbon, the calibrated dates should be reported as calendar years (e.g., 500 B.C.* or 2450 B.P.*) and the calibration table specified. K/Ar dates should also include the standard error; dates less than 1 million years old should be written out (e.g., 150,000 ± 10,000 yr), but dates of a million or more years may be expressed in my (e.g., 2.43 my). If laboratory numbers have been designated, they should be given in parentheses following the date (e.g., 2.43 my (QL_K-10)).

Chemical Notation. International notation should be employed in all cases (e.g., ^{18}O, ^{14}C, ^{40}K).

Temperature Notation. Temperatures should be expressed in degrees Celsius (°C), with Fahrenheit equivalents in parentheses if originally reported in such units (e.g., 6°C; 20°C (68°F)).

Illustrations and Tables. All illustrations and tables should be cited somewhere in the body of the paper and in sequence (e.g., ". . . as illustrated in Figure 5"; ". . . in the region (Fig. 5)"; "Figure 4 shows . . ."; ". . . in Alaska and California (Figs. 4 and 5)"; "The values in Table 6 are taken from . . ." ". . . the data obtained in this study (Table 1).")

Footnotes. Footnotes in the *text* should be identified by superscripts consisting of Arabic numerals and should be typed on a separate sheet; footnotes in the *tables* should be identified by superscripts consisting of the lowercase letters a, b, c, etc., and placed at the bottom of the table.

Tables. Tables should be denoted by Arabic numerals and cited consecutively in the text. Each table should be titled and typed double-spaced on a separate sheet. *Units must be clearly indicated for each of the column entries in the table*.

Figures. All figures should be denoted by Arabic numerals and cited consecutively in the text, with figure legends typed on a separate sheet. Units should be clearly indicated in the figures themselves.

Please Note: All figures are to be submitted in such form as to permit photographic reproduction without retouching or redrawing, including the lettering. Lettering is reproduced as part of the photoengraving and is not set in type. Line drawings should be carefully drafted with black India ink on white drawing paper or blue drafting cloth, if possible no larger than 22- × 28-cm (8.5- × 11-in.) overall. The lettering should be large enough to allow a 50% reduction. High-quality glossy prints are acceptable for drawings and required for photographs. Color plates or fold-out illustrations cannot be accommodated unless financed by the author.

References. References should be cited in the text by author's surname and date such as "Doe (1970) reported that . . ." ". . . as previously reported (Doe *et al.*, 1970)." Suffixes (a, b, etc.) should be used to distinguish two or more works by the same author(s) in the same year; *e.g.*, Doe (1971a, 1971b). *Page numbers should be given whenever practicable*. A direct quotation should always be page referenced; a paraphrased statement should be page referenced if the article exceeds 10 pages. The reference section should be arranged alphabetically according to the author's surname. Order of items: author(s), date of publication, title of article, journal or book title (written out in full rather than abbreviated), volume number, inclusive pages, and (for books only) publisher and city, e.g.:

Zin, S. (1971a). The problem of Quaternary climatic changes. *Quaternary Research* 1, 1–10.

Falk, B., and Li, M. (1972). "The Cause of Quaternary Climatic Changes." Vol. 1. Academic Press, New York.

Cohen, R. (1967). The equatorial ionosphere. *In* "Physics of Geomagnetic Phenomena." (S. Matsushita and W. H. Campbell, Eds.), Vol. 1, pp. 561–613. Academic Press, New York

Author's alterations in excess of 10% of the cost of composition will be charged to the author.

Reprints. 50 reprints of each article will be supplied free of charge. Additional reprints can be ordered on the form accompanying galley proof.
